

AIRCORN

PNEUMATIC PRODUCTION SCALING MACHINES PISTON TYPE

These machines are ideal for the descaling of deck and other large areas. All models are good manoeuvrable. All models are made with the same liners and pistons. So it is possible to change (the liner or piston) from one model to another (economical).

For these models we can supply non-spark an replaceable betheads. We manufacture in standard or oversize and other parts for all makes of pneumatic hammers.

We also carry out repairs on any pneumatic tools, pumps etc.

AVAILABLE !

With Water-Curtain
For use on dangerous places

When ordering please mention : S - standard (with tungsten carbide inserts), F - with filter and lubricator

N.s. - Non spark C - Replaceable scaling head
