

# AIRCOM

## PNEUMATIC AND EJECTION TYPE EXPLOSIVE PREVENTION VACUUM CLEANER

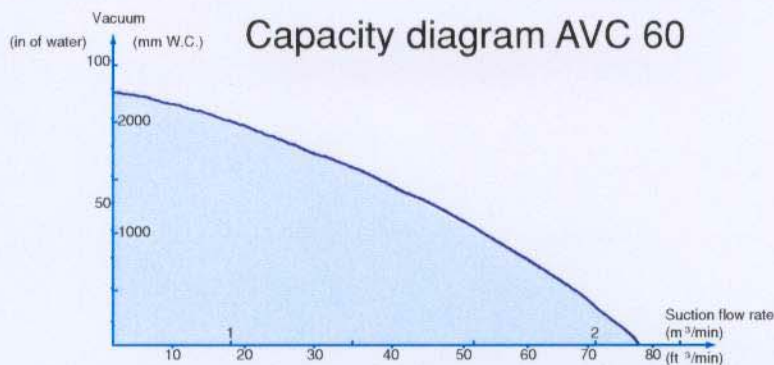

- Application:
- Applicable to absorb the dust and miscellaneous items of work site environment.
  - Applicable for chemical industry to absorb inflammable liquid miscellaneous item and explosive liquid etc.
  - Applicable to absorb mechanical or processing machine counter and general work surrounding metal scraps, etc.

- Characteristics:
- Modern function design, by means of air pressure ejection to form super strong absorption.
  - Free from power driving therefore safer to work with.
  - Super thin filter 0.3mm, able to resist oil, resist water, for cleaning, easy to be replaced.
  - Devised with 25 liters of stainless barrel, able to resist erosion, without rust, light and easy in maintenance.
  - Absorb liquid to full capacity to auto stop absorption, convenient in operation.
