

AIRCOM

AIR POWERED VACUUM CLEANER IHK 63

The AIRCOM IHK-63 is an air powered vacuum cleaner, without any moving parts, strong and effective, working on the most simple principle of vacuum cleaning.

The strong suction power, which goes up to 0.6 bar vacuum, makes it possible to dispose all kinds of liquids and sludges. The 2 1/2" hose sucks-up and transport water, emulsions, oil, grains and blasting grit, with a diameter up to 5 mm. Cleaning bilges or pipes is no effort for the IHK-63.

Suction and discharge hose can be as long as 10 metres.

The carriage makes it simple to transport and move along with your work.

Other applications are:

- * Decharging of dusty air..
 - * Ventilating compartments.
 - * Disposal of gasses and smogs.
- This is possible with even longer hoses.

Air consumption	: 0.9 cbm/min
Suction height	: 2.0 metres column
Suction air	: 14 000 l/min.
Hose diameter	: 63 mm = 2 1/2"
Noise level	: 80 dB (A)

Technical specifications: Based on 7 bar working pressure.

At lower pressure, the capacities will be lower.
