

## **DIBO ECN-M (incl. standard accessories)**

The ECN-M cold water high-pressure cleaner is an industrial cleaner for professional and intensive use. This high-pressure cleaner is mounted on an electrolytically galvanised and powder-lacquered frame. A stainless steel cover protects the motor/pump unit from splashing by water and dirt. A sturdy handle, fitted with 2 lance holders, and 4 moulded rubber wheels make this appliance an industrial cleaner that can be used in several fields.

Its radial pump with 3 ceramic plungers and a brass/nickel-plated pump head mean that it is an enormous source of power, which is also very easy to maintain.

The ECN series is available in various versions (i.e. motor ratings).

### Supplied as standard with:

- detergent injector
- double spray lance with low and high-pressure nozzle
- single spray lance with rotating nozzle
- high-pressure pistol
- 10 m high-pressure hose
- 10 m electric cable
- 2 built-in hanging hooks for high-pressure hose and electric cable
- pressure gauge
- stepless pressure and flow regulation via by-pass valve
- coarse particle filter
- direct-in

*(Subject to alternation)*
