

KAROMAT COLD WATER HIGH PRESSURE CLEANER

KD 900 – 170

The Karomat KD 900-170 cold water high pressure cleaner is very easy to handle.

Because of the two robust wheels and the strong push bar, the cleaner is very manoeuvrable. The 3-point ground contact ensures a steady positioning on every surface.

The stainless steel cover protects the unit, still the pressure is very accessible to control by the regulator on top and the gauge is easy to read .

The overflow valve prevents the machine from starting/stopping when the handle is operated. This prevents coinstantaneous power peaks on the net.

The included 8 ltr. detergent tank feeds the suction type chemical dozer through a tube, so both build-on tank or external tanks can be used for mixing chemicals, soaps or detergents. The 4.0 kW. motor is protected by an electric thermal protector.

Standard supplied with 10 mtr HP hose, lance, gun, nozzle, chemical dozer and 5 mtr cable.

TECHNICAL DATA

KD 900-170	
Power supply kW (HP)	4 (6.0)
Voltage (V) triple phase	400V-50 Hz, 440V-60 Hz or 3x220V 50/60 Hz
Pump	3 cilinder piston pump wit ceramic pistons
Capacity	Max 170 Bar
Water flow	Max 900 liter/hr
Max. inlet water temp	60 degrees Celcius
Dimensions LxWxH (cm)	75 x 51 x 49 cm
Weight (Kg)	42 Kg
